

## \*tmx presents visual vocabulary trainer

### Learn languages intuitively like a child with \*tmx808

Frankfurt/M. German design team \*tmx releases a multilingual vocabulary training software that combines graphic design and Superlearning techniques. To simulate the way a child learns, the software \*tmx808 focuses on hundreds of images and the desire to play, avoiding anything that tastes like cram.

In addition to a virtual trip through various topics from car to sexuality, \*tmx808 offers a language lab, games like Free Fall and Superlearning with Chillout music. The software contains more than 808 expressions distilled from all parts of everyday (and not-so-everyday) life as well as over 300 of the most important, common, beautiful, or useless phrases.

Whether to brush up one's French for the next Weekend in Paris or to avoid looking like a bore on the next business trip to Milano, \*tmx808 is the right tool. Of course the software can also be used to test and expand existing language skills.

Design plays an eminent role in \*tmx808. Over a period of three years, \*tmx founder Ralf Hoffmann has taken more than 700 photographs from four continents, using seven different cameras. Finally these images were processed to reflect different styles from the Seventies to the present time.

\*tmx808 has been designed for distribution over the Internet. The software is available for free at [www.tmx808.com](http://www.tmx808.com), the language modules are sold online for EUR 20,- and can be downloaded instantaneously. As an option, a CD-ROM can be ordered as a backup or to avoid the download.

Currently 6 languages are available: **Français, Italiano, Español, Deutsch, British** and **American English**.

Alternatively a single CD-ROM titled \*tmx808 world featuring all 6 languages as well as the software and various Chillout tracks can be ordered for EUR 79,90.

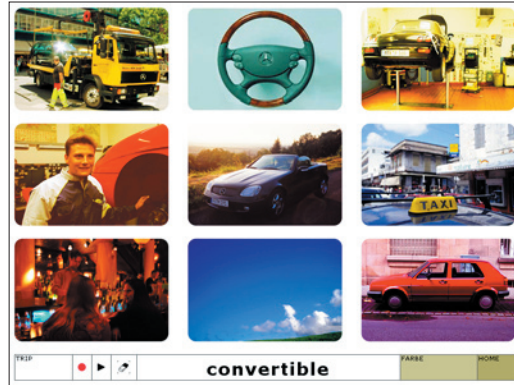

\*tmx is a two-headed team based near Frankfurt/Main, that concentrates on languages, photography and music. \*tmx is one of Germany's leading companies for language software.

The language training software \*tmx 4.0 was the best selling Edutainment product in Germany for more than 18 months and has won numerous awards. \*tmx is also cooperating with T-Online AG, Germany's No. 1 internet access provider.
